New York, NY

Having spent my life crafting and creating, from live theater to lattes, and wooly hats to ceramic tableware, I was excited to discover the same joy in designing and coding. I've learned that programming delights my creative and mathematical brain, allowing me to bring my unique blend of high-pressure logistical problem solving, teamwork, and morale-driving communication style to any job.

Technical Skills

Frontend: Javascript, React, HTML, CSS, styled-components, Bootstrap
Backend: Ruby, Rails, SQL, ActiveRecord, API
UX Design: Sketch, Adobe XD, Figma, Balsalmiq
Tools: Git, Github, Firebase

Technical Projects

Yum Yum Fresh (1.0) GitHub - frontend | GitHub - backend | Demo Video
Eat Seasonal, Eat Local - Yum Yum Fresh 1.0 is a local, seasonal produce finder
- Collaborated with team of 5 to design and build user interface using React and Bootstrap
- Created UX design; determined back-end data display; designed styling, colors, logo, and interface; optimized responsive design of site using media queries
- Participated in the creation of custom API with back-end developers
- Orchestrated shift from original idea (version 1.0) to forthcoming concept 2.0; crafted mission, vision, and values statements; spearheaded the reenvisioning and redesign of the project

WasIGhosted.com GitHub - frontend | Live site
Not every unsuccessful date ends in being ghosted
- Executed complete site design and build of single page application from concept to launch
- Utilized logic-tree implementation to determine ghosted outcomes

Pastiche GitHub - frontend | GitHub - backend | Demo Video
Mocktail recipe database, because everyone deserves a good drink and a good time.
- Created custom, queryable API on Rails utilizing Active Record and serializers
- Conceptualized design and layout with easily reused components, and incorporating full CRUD
- Implemented React-router for ease of navigation

Professional Experience

The 1692 Co. | *Remote;* 2020 - present
Web Designer and Developer
- Owner and founder of bespoke website design and build company
- Engineered websites from concept to deployment using React, JavaScript, HTML, CSS, and Rails
- Crafted and revised design for clients from kickoff meeting to final approval with UX and mobile-first design in mind
- Guided clients through design and build process, leading discussions to balance aesthetic and functional needs and preferences specific to each project.

Sawada Coffee | **Sardella** | **Blue Bottle Coffee** | *New York, NY & St. Louis, MO;* 2012 - present
Lead Barista | Trainer
- Managed product transactions, curated personalized coffee and tea orders, secured sales for more than 200 daily customers, and resolved customer conflicts
- Educated and trained co-workers to ensure quality and consistency across menu and staff

Women's Flat Track Derby Association (WFTDA) | *International;* 2006-Present
Roller Derby Referee
- Coached and mentored officials to achieve their personal goals, from refereeing their first game to being selected to officiate high level roller derby tournaments
- Demonstrated excellence in officiating, resulting in invitations to referee the WFTDA Division 1 International post-season playoffs in Malmö, Sweden (2017), Au Coruña, Spain (2018), and Seattle, WA (2019, declined invitation due to injury)

Education

Flatiron School *New York, NY* | October 2020 - January 2021
Professional Certificate, *Fullstack Software Engineering*

Florida State University *Tallahassee, FL* | 2002 - 2008
Completed 100+ hours of coursework in *Technical Theater Production* and *Classical Civilizations*
